Connor Ashley

New Canaan, CT | (203) 505-4137 | cashleydata@gmail.com | linkedin.com/in/cashleydata | cashley104.github.io/CashleyData.github.io

Profile

Business and operations analyst with an economics background and experience in stakeholder reporting, data quality, and workflow automation. Uses Excel, SQL, Tableau, Power BI, and Python to translate operational needs into dashboards and workflow tools.

Skills

- **Tools & Technologies:** Excel (PivotTables, SUMIFS, INDEX/MATCH), SQL Server, Tableau, Power BI, Python (Pandas, Selenium), browser automation, AI tools (ChatGPT, Claude)
- **Business & Analytical Skills:** Performance reporting, requirements clarification, stakeholder communication, data validation, CRM data matching, dashboard development, workflow automation

Professional Experience

Career Resources, Inc. - Bridgeport, CT | **Data Analyst** | Feb 2025 to Present

- Built Tableau dashboards comparing four years of Connecticut reentry trends across end-of-sentence and community-supervision populations.
- Combined multi-year Excel data and reshaped it from wide to long format for Tableau; validated annual percentages and separated housing measures by source and population.
- Created and refined FY2024 impact infographics with leadership, presenting outcomes covering 48,943 individuals, nearly 3,000 case-managed clients, and 300+ employers for board members and funders.

New Canaan Land Trust - New Canaan, CT | **Data Analyst** | Feb 2024 to Dec 2024

- Built Python/Selenium workflows to collect current municipal property-owner data and produce an Excel list staff used for outreach to neighboring property owners.
- Matched property-owner records against Little Green Light CRM exports in Excel, identifying existing members and ownership changes for staff outreach.

New Canaan Recreation Dept. - New Canaan, CT | **Front Desk Manager** | May 2018 to Aug 2018

- Managed membership check-ins, payments, phone inquiries, and daily front-desk operations; resolved questions from members and visitors.

ClearVest Advisers LLC - New York, NY | **Data Analyst Intern** | May 2017 to August 2017

- Co-developed Python data-mining tools with Selenium, BeautifulSoup and Pandas that automated securities data collection and restructured results into analysis-ready datasets.

Selected Projects

- **Walmart Store Performance** - Built independent Python and SQL Server reporting and an Excel scenario-planning model with Base, Upside, and Downside assumptions, tracking variance and forecast accuracy across 45 stores and 81 departments.
- **Application Workflow Automation** - Built a JavaScript Chrome extension that automates multi-step job applications across LinkedIn, Indeed, Workday, and other applicant-tracking systems: finds and filters postings, selects the matching resume, fills and verifies form answers, saves progress, and routes unclear questions to manual review.
- **Left Right Audio Splitter** - Built and published a Chrome extension used by 1,000+ users, using the Web Audio API for per-tab channel routing, one-ear audio correction, channel swapping, and automatic window-based routing.
- **NBA After-Timeout Coaching Dashboard** - Built an interactive dashboard ranking coaches by observed after-timeout shooting efficiency, using a Python play-by-play pipeline and audited true-shooting and effective-field-goal measures against team-season baselines.
